The School Science Review

Volume 61
September 1979 to June 1980

No. 214: pp. 1-198
No. 215: pp. 199-400
No. 216: pp. 401-610
No. 217: pp. 611-822

PUBLISHED BY
THE ASSOCIATION FOR SCIENCE EDUCATION
COLLEGE LANE, HATFIELD, HERTS.

INDEX TO AUTHORS OF MAJOR ARTICLES

BAINBRIDGE, J. An alarm call for primary school science 623
BARRETT, M. S. The Davy bicentenary event 203
CLEGG, A. S. Applied science: a course for pupils of low educational achievement 454
COLES, M. H. Libraries and laboratories 682
COOMBES, S. D. Slip kits 28
DIXON, A. The proposed common system of examining at 16+ 247
FIRNBERG, D. How do we prepare the children of today for the world of tomorrow 5
GILBERT, J. K. Some problems of learning science 664
GREATOREX, D. The organisation of project work in a Mode 3 O-Level chemistry course 427
HARMER, A. F. Tin-mining, extraction and uses, a Malaysian school project 476
HARPER, G. H. Alternatives to evolutionism 15
HEALEY, J. A. D. Distillation as a practical problem 464
HUNT, C. B. Chemistry and the internal combustion engine II: Pollution problems 41
HUTCHINSON, C. S. Biological classification 239
JOHNSON, H. The science writer and publisher 52
JONES, A. V. Gypsum; a school/industry science project 405
JONES, C. E. The chemistry of Concorde 675
JUDSON, P. F. An introduction to photo-micrography 214
LINDOP, N. Science and democracy: 1980 Presidential Address 615
LISTER, J. M. The organisation of project work in a Mode 3 O-Level chemistry course 427
MAY, P. F. Gypsum; a school/industry science project 405
MORLEY, M. Applied science; a course for pupils of low educational achievement 454
OSBORNE, R. J. Some problems of learning science 664
PHILLIPS, P. S. The biochemistry and chemistry of beer making 227
PRITCHETT, M. Gypsum; a school/industry science project 405
SIDDONS, J. C. Some examples of Fresnel diffraction 441
STANYARD, J. C. The Davy bicentenary event 203
STUART, A. N. Gypsum: a school/industry science project 405
TALL, G. E. Patterns of science education as illustrated by examination entries from 1962-77 and the core curriculum 254
WARD, A. Questions in primary science 639
WARD, A. Thoughts on the style of primary science 418
WHITE, C. Libraries and laboratories 682
VINCENT, J. F. V. Biomechanics in schools 648

SUBJECT INDEX

References refer to articles, notes etc., as follows:

B	Biology Notes
C	Chemistry Notes
L	Letters
MA	Major Articles
MS	Middle School Notes
NC	Notes and Correspondence
P	Physics Notes
SE	Science Education Notes

Absolute determination of weight P 525
Acceleration, a graphical approach P 539
Acceleration, measurement of uniform P 118
Acid-base titration curves C, L 94, 576
Alternatives to evolutionism MA, L 5, 161, 573, 791
Amines, safety of commercial L 167, 573
Amphoteric oxides and hydroxides C 715
Applied science: a course for pupils of low educational achievement MA 454
Arthropod activity – monitoring B 78
Assessment systems using criterion referenced measurement SE 765
Astrology and astronomy L 367
Atmospheric pressure, estimating MS 752

Beer making, the biochemistry of MA 227
Behavioural experiments with a fresh-water mollusc B 67
Bicarbonate indicator L 367
Biological classification MA, L 239, 790
Biology, A- and S-level reading list Part XI B 266
Biology, A-level experimental design questions B 275
Biology O-level: how to play the game to win NC 363
Biology, revision exercise B 74
Biomechanics in schools MA 648
Block and tackle without pulleys P 128
Blood pressure and its measurement B 68
Bonding, teaching aids C 104
British Gas Education Service NC 780
Brownian motion MS 749
Buoyancy MS 761

Camera, pinhole MS 132, 327
Carbon monoxide, preparation of C 290
Casswell, Winifred M. 1888-1980 NC 779
Chemical reaction, rates of C 288
Chemicals, dispensing of solid MS 753
Chemistry and the internal combustion engine Part II MA 41
Chemistry time-line, a C 518
Children of today, how do we prepare for the world of tomorrow? MA 5
Chromatography, elementary MS 325
Chromatography of industrial dyes C 718
Circuit and soldering checking exercise P 742
Circuit board, a no solder P 729
Classification, biological MA, L 239, 790
Close packing of spheres C 523
Colour code for electrical wiring L 168
Commercial amines, safety L 167
Common system of examining at 16+, the proposed MA 247
Computers – introduction through population genetics B 75
Concorde, chemistry of MA 675
Conductance titration, formula of a double salt C 712
Conductivity detector, an electro-chemical C 720
Contractions of muscle fibres, in vitro B 690
Cooling curve for water MS 132
Copper (II) complex, analysis of C 708
Copper compound, an unusual C 287
Copper (II) hydroxide, the amphoteric nature of C 506
Coriolis effect, a demonstration of P, L 313, 793
Criterion – referenced measurement SE 765
Current balance L 576

Davy bicentenary event MA 203
Deionizer, a water C 107
Detergents – testing household MS 754
Digestion of starch -- using a disposable syringe B 697
Dimerization – a model C 106

Dispensing solid chemicals MS 753
Distillation as a practical problem MA 464
Doppler effect in sound P 538
Dyes, separation during chromatography MS 325

E.h.t. voltmeter P 312
Earth and insulation testers L 795
Ecology of freshwater mussels B 493
Electric motor, a synchronous MS 749
Electric still, a homemade MS 551
Electricity, production of – using a lemon MS 551
Electrochemical conductivity detector C 720
Electrochemistry C 714
Electrolysis apparatus MS 320
Electrolysis demonstrating the laws of C 289
Electromagnetic radiation P 743
Electron beam, measuring the diameter of P 312
Electrophilic aromatic substitution C, L 98, 573
Energy transfer, impulse and average force P 316
Enzyme characteristics, using liver catalase B 70
Eudiometry, a spark source for C 721
Extension-load curves L 156
Eye protection, Safety III NC 780

Fern spore development B 695
Ferrocene, preparation of C 91
Fingerprints MS 545
Floating magnet, the MS 546
Flotation, a lesson on MS 759
Freezer sprays, experiments with MS 324
Freshwater mollusc behavioural experiments B 67
Freshwater mussels, ecology of B 493
Fresnel diffraction, some examples of MA 441
Fume cupboard safety screen C 512

Gas-chromatograph II, applications C 82
Gas production, small scale MS 326
Gypsum: a school/industry science project MA 405

Humidity preferences – erroneous analysis of L 164
Hydrogen – Safety II C 292

Incubator, a variable temperature B 490
Industrial chemicals, effect on plants MS 756
Industry – school liaison SE 340
Insulation testers L 795
Ions and neutralization C 291
Ions, the polarizing power of C 295
Isomers, calculating numbers of L 793

Jet engine in a vacuum MS 750

Kellner Solvay cell C 90

Language in science lessons SE 342
Leaf keys in winter MS 326
Learning science, some problems in MA 664
Libraries and laboratories MA 682
Light emitting diodes, solid state P 302
Limonene from orange peel C 517
Lithium chemistry L 165
Liver catalase, to demonstrate enzyme characteristics B 70

Magnesium oxide, formula of C 717
Magnet, the floating MS 546
Malaise trap B, L 78, 577
Mammal trap B 701
Mass and weight L, L 159, 370
Mass spectroscopy – analysis of a mass peak C 515
Matter through matter – an optical illusion MS 759
Measure, how well can your pupils? SE 770
Measurement of internal diameters of glass tubes P 525
Metal oxidation, an industrial link C 283
Metallic glass: viscous flow in a random atomic solid C 284
2-methylbut-2-ene; a convenient alkane C 505
Microbial biochemistry, the manufacture of vinegar B 278
Microcomputers in the curriculum SE 336
Microelectronics and science education L 370
Microprojectors, restoration of L 795
Microscope, a practical test on MS 548
Microscopes, choosing B 698
Mode 3 CSE science course SE 560
Mode 3 O-level chemistry: the organisation of project work MA 427
Multiple-choice test results, analysis of L 574
Muscle fibres, contraction of B 690
Mycotoxins in mould-ripened foods B 702

Newton's disc: making a whizzer MS 319
Newton's law of cooling L 159
Newton's third law of motion: a demonstration MS 138
Nitration of benzene C 101
Nitric acid, manufacture of L 572
Nitric (V) acid, the thermal decomposition of C 711
Nitrogen metabolism, a revision exercise B 74
Notes for contributors to the SSR NC 151
Nuffield A-level biology experimental design questions B 275
Nuffield A-level chemical engineering option, apparatus for C 508

Obituary, Winifred M. Casswell NC 779
Objective measurement in education L 366
Oil from an oil reservoir, obtaining – Part II, III P 111, 528
Optical isomers, nomenclature of L 371
Orange peel, limonene from C 517
Organic chemistry in schools SE 353
Organic preparations at A-level L 571
Oscillating system, testing an P 748
Oscillations, from damped to maintained P 731
Overhead projector, demonstrations using a B 276
Oxyanions, a learning aid for C 710

pH meters, a testing device for C 504
pKa, determination of C 103
Passivity of iron L 157
Patterns of science education, by examination entries 1962-77 MA 254
Patterns, SCISP revised references NC 358
Peristaltic pump C 285
Phenolphthalein, an extension experiment C 511
Phenylamine complex, an analysis of C 722
Photochemical reaction C 520
Photographing a rocket MS 135
Photomicrography, an introduction to MA, L 214, 792
Physical science, a pattern associated with teaching SE 349
Physics extracts Parts IV (1978) P 531
Physics teachers, shortage of NC 783
Physics, the relative importance for male and female SE 774
Pinhole camera MS 132, 327
Pipette, an improvised safety C 100
Pipette filters, renovation of C 517
Plasmolysis experiments, neutral red in B 707
Plastic covers MS 138
Polarization by reflection using a laser P 110
Polarizing power of ions C 295
Polaroid strobe photos P 736
Popper and Kuhn L 158
Portable fume cupboard safety screen C 520
Practical work, a case for variety SE 762
Presidential address: What next? (1979) NC 153
Presidential address: Science and democracy (1980) MA 615
Pressure between two bubbles MS 319
Primary school science, an alarm call for MA 623
Primary science, questions of MA 639
Primary science, the problem of SE 556
Primary science, thoughts on the style of MA 418
Programmable calculators, uses for L 575
Pyrolysis of metal ethanoates C 94

Random access memory (RAM) experiments P 308
Random walk experiments P 318
Reactive dyes NC 565
Readability of scientific prose L 160
Recirculating flow channel, for use with an o.h.p. P 735
Rectilinear propagation of light L 164
Resistive putty P 741
Resonance P 537
Restoration of old microprojectors L 795
Ruler, how bent is a? P 129

Safety III – Eye protection NC 780
Safety II – Hydrogen C 292
Safety screen for portable fume cupboards C 520
School – industry liaison SE 340
School – industry science project, a: gypsum MA 405
Science and democracy – Presidential address MA 615
Science in general studies SE 553
Science Museum, teaching apparatus at the MC 564
Science writer and the publisher MA 52
"Shepherd spoons", an alternative to L 367
Silver nitrate, price of L 796
Silver residues, recovery of L 573
Slip kits MA 28
Small-scale gas production MS 326
Smoke ring machine MS 752
Sodium fusion C 109
Soldering and circuit checking exercise P 742
Solid state light emitting diodes P 302
Solubility products, determination of C 710
Sound, speed of in a steel bar P 527
Spirogyra, studies on B 71
Spirometer tracings L 574
Square pulses into C-R circuits P 746
Still, an electric MS 551
Sucrose density-gradient centrifugation B 693
Sulphuric acid burns C 294
Sulphuric acid on sucrose, action of C 281

Testing for understanding SE 147
Testing pH meters, a device for C 504
Thermit reactions in a sand mould C 709
Tin-mining, extraction, and uses MA 476

Understanding large numbers L 794
Uniform acceleration P 118
Urease B 496

Valency cards for teaching formulae C 727
Valency, teaching of C 724
Variable temperature incubator B 490

Vinegar, the manufacture of B 278
Viscous flow in a random atomic solid C 284
Volta's pistol MS 140
Voltmeter, an inexpensive e.h.t. P 312
Vortex ring machines MS 752

Wallchart store MS 754
Water content of foods MS 132
Water, cooling curve for MS 132
Water deionizer C 107
Water uptake in a shoot B 274
Wax lenses MS 547
Weight, the absolute determination of P 525
West German ideas on chemistry teaching II, III NC 359, 786
White Elec. Instr. Co, A short history NC 357
Whizzer, making a MS 319
Wildlife conservation SE 142
Woodlice L, MS 164, 321

Zinc from old torch batteries L 795

To LIBRARIANS AND NEW READERS

A cumulative index to articles in earlier issues of **The School Science Review** is available from:-

The Publications Officer,
Association for Science Education,
College Lane,
Hatfield, Herts. AL10 9AA

This index is in four parts and the price (June 1980) including postage for each part is:-

Nos.	1 - 121 (1919-1952)	£1.00
Nos.	122 - 151 (1952-1962)	£1.00
Nos.	152 - 163 (1962-1966)	£1.00
Nos.	164 - 201 (1966-1976)	£1.20
